Laser die-cutting **Pro**
any-CUT II

ANY-CUT II

Compact, All-In-One Laser Finisher

Arrow Systems, Inc

80 or 150 watt laser option for unmatched value!

Treat yourself with the best valued laser on the market! With several cutting features and separate laser power options, getting the perfect laser for your business's needs has never been easier.

All in one finishing system streamlines production

With all the essential finishing functions for your work-flow, you can now laser finish jobs in a single pass! Whether it's lamination, laser cutting, removing waste or in-line slitting, the ANYCUT II is the laser solution you've been searching for.

Compact, space saving footprint

The ANYCUT II's compact footprint provides maximum power and efficiency without sacrificing crucial floorspace. Equipped with a powerful fume extractor, the ANYCUT II can operate in a production facility or small office space with ease.

Say Goodbye to flexible dies, blades, tooling and headaches!

No more die charges, lead times, labor for tooling, or hassle. Help make your business more *efficient and competitive* by lowering your cost per label with reduced consumables, labor, waste and setup time!

Compatible with in-line printing for an easy 1 step process!

Using the new ANY-LINK system with the ANYCUT II will allow you to integrate nearly any print system, in-line, with the ANYCUT II for a fast and easy one step operation!

Various cutting functions can be performed simultaneously.

Full cuts, kiss cuts, perforations, and variable data marking can all be performed in a single pass for unmatched versatility and productivity.

User-friendly design - anyone can become a laser finishing expert

The easy and intuitive design of the ANYCUT II means almost anyone, with no experience, can become proficient with a simple training session and a little practice!

Low waste means more for your bottom line

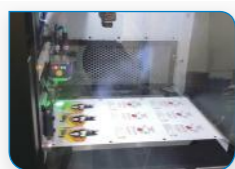

The ANYCUT II is ergonomically designed for easy operation and low waste. With a short web path for fast and easy setup, you can now make your material and efforts go farther than ever before!

Unrivalled versatility

Cut papers *without yellowing*, films, and even metalized & reflective materials with ease. Die-cutting has never been easier or more convenient than now! With no limitation on label length, you can cut specially sized labels, for even the most challenging jobs.

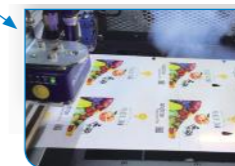

Lamination & Lamination liner removal

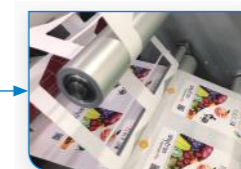

Auto job changeover
The sensor detects each QRcode which contains cutting information to change the job automatically, in real time!
